1. Five Active Pre-Positioned Federal Dockets Ready for Immediate Oklahoma DoD Pull

- DoD CDAO Tradewinds Solutions Marketplace (TSM): Docket 10-26-4046 (Status: Received | Video SHA-256: c597865785eae6fdad6fdf6803a2710aaa0fb5c2fa28fe512b6ed76ef8b7a7fd | Merkle Root: d65049efcf06298f84d41436131794fc3cc5607873a2a596b5ad355f6ee67ccb).
- USACE ERDC CERL Commercial Solutions Opening (CSO 2026): Submittable Docket #0126 (Operational Energy | Status: Received).
- USACE ERDC CERL BAA 2026: Submittable Docket #0069 (Critical Infrastructure & Utility Systems Protection | Status: In-Progress).
- USACE ERDC GSL BAA 2027: Submittable Docket #0008 (Bridge Research GSL-19 | Status: In-Progress).
- USACE ERDC ITL BAA 2027: Submittable Docket #0005 (Cybersecurity ITL-4 | Status: Received).

2. Technical Capability & Mission Fit for Oklahoma Installations (TRL 4 Baseline to TRL 6)

Per GAO-21-81, GAO-24-106137, and CISA Volt Typhoon advisories, base microgrids and OT networks rely on PLCs scanning at 50-200ms, while arc-flash faults destroy switchgear in <4.16ms and thermal excursions occur in 6.0ms. Project Ebony v8.0.0 is an active TRL 4 software testbed on local loopback 127.0.0.1 (0% cloud, 638 C2 modules, 86/86 passing test suites, 52 SQLite WORM tables):

- Tinker Air Force Base (72nd ABW Civil Engineering & OC-ALC): Brain 1 models a <50us bare-metal loop, 2.04us RS-485 Modbus FC05 trip, and 36.75ns SiC MOSFET cutoff target (28.5W on 24V DC) for depot switchgear, while Brain 2 automates ASTM D6433 airfield pavement PCI NDE ($250/sortie vs. $4,600/day manual closures).
- McAlester Army Ammunition Plant (MCAAP Industrial OT): Air-gapped cyber-physical safety interlock and Brain 3 SHA-256 WORM Merkle DAG (<0.15ms sealing, 17/17 Red-Team vectors blocked with single-byte tamper zeroization).
- USACE Tulsa District (Dams, Locks, Bridges & MILCON): Automated GSL-19 / ASTM D6433 bridge and dam crack-width mensuration with WORM chain-of-custody logs and 110-control NIST SP 800-171 / 800-82 compliance.

3. Rapid Acquisition Pathways, Pricing & DFARS 252.227-7018 Background IP Protection

Oklahoma Contracting Officers can pull Docket 10-26-4046 or ERDC Dockets #0126/#0069/#0008/#0005 via 10 U.S.C. 4022 Prototype OTA (0% Cost Share for NTDC/SDB), ERDCWERX CSO Call Order, or FAR Part 12/13 Award: (a) CLIN 0001 Base Pilot: $2,450/mo; (b) CLIN 1004-A 1-Node Bundle: $895,000/yr; (c) 12-Month Phase-1 TRL 6 Prototype: $1,200,000.00 ($150,000.00 Mobilization). Background IP retained under DFARS 252.227-7018.
